

***THE OFFSHORE PETROLEUM PRODUCTION AND PIPE-LINES
(ASSESSMENT OF ENVIRONMENTAL EFFECTS) REGULATIONS 1999
(THE EIA REGULATIONS)***

**PETROLEUM OPERATIONS NOTICE 16
SUBMISSION OF AN ENVIRONMENTAL STATEMENT
IN SUPPORT OF AN APPLICATION FOR CONSENT OF
A PROJECT**

DATA ON THIS FORM MAY BE RELEASED TO THE PUBLIC

The PON16 is a form that supports the submission of Environmental Statement under the EIA Regulations detailing the Application for Consent required under the Petroleum Act 1998.

The regulator and consultees will be notified that the undertaker has submitted a completed PON16 form and an Environmental Statement. It is the responsibility of the undertaker to ensure that the Application for Consent either for a field development, construction of a pipeline or the drilling of a well is submitted in accordance with the requirements of the Petroleum Act 1998.

Any queries regarding the PON16 form, or a specific application, should be addressed to:

Section B1: PROJECT INFORMATION

Please specify the name of the Project name for which the Application for Consent under the Petroleum Act 1998 is being made.

Name: **Shelley Field Development**

Name of Environmental Statement Submitted (if different from Project Name)

Name: N/A

Please indicate the Nature of the application you are making with this form:

- (i) **Drilling of Wells** ✓
- (ii) **Getting of Petroleum** ✓
- (iii) **Construction of a Pipeline** ✓

Please indicate the Main Elements of the Activities that are the subject of this Application:

- (i) Field Development with Installations, Wells and Export Pipelines ✓
- (ii) ~~Field Development with Installations and Wells~~
- (iii) ~~Field Development — Incremental Project —~~
- (iv) ~~Field Re-development~~
- (v) ~~Pipeline(s) (including repair and replacement)~~
- (vi) ~~Exploration Well(s)~~
- (vii) ~~Other (Please state)~~

Section B2: PROJECT LOCATION

Main Project Location

Quad **22**
Block Number **2b**
Block Suffix **N/A**

Project location

57° 54' 10.04" North, 01° 24' 20.24" East
(Please include N and W / E designations)

Distance to nearest UK coastline **192 km** Which coast? **Scotland**

Distance to nearest transboundary line **32 km** Which line? **UK/ Norway**

Short Description of Project

Oilexco is planning to develop the Shelley field located in Block 22/2b in the central North Sea, approximately 192 kilometres east of Fraserburgh, Scotland. The development will comprise two subsea production wells (and possibly one future production well) and one water disposal/injection well located at the Shelley Drill Centre. The production wells will be tied back to a production manifold and onwards through a 2.2 kilometre 8" pipeline to the Sevan 300 FPSO known as the Sevan Voyageur (similar to the Hummingbird FPSO to be installed at the Chestnut Field). A 2.2 kilometre, 8 inch water disposal/injection pipeline will be installed from the Sevan Voyageur and tied directly into the respective tree at the Shelley Drill Centre. There will also be an electro hydraulic control umbilical connecting the Sevan Voyageur to the production manifold at the Shelley Drill Centre.

Licence Number Under Which the Activity(ies) will
be Undertaken **P.1260**

Licence Awarded in Round (if appropriate) **23rd Round**

Licencees and Percentage of Equity Held
Oilexco North Sea Limited – 100%

Section B3: INCREMENTAL PROJECTS

If an 'Incremental Project', please provide the Name of the original project.

Name:

Has this project been the subject
of a previous Environmental Statement?

Date of Submission to DTI of Any Earlier Statement Related to this project

Reference Number of Earlier Statement

Section B4: HOST INSTALLATION

Host Installation Name N/A

Associated Field Name(s) N/A

Has this Project been the Subject of an Environmental Statement (ES) **N/A**

Date of Submission to DTI of Any Earlier ES Related to the host installation. **N/A**

Reference Number of Any Earlier ES Related to this installation. **N/A**

Section C: PROJECT DATES AND IMPACTS

Anticipated Duration of works: Subject to necessary consents and approvals, installation and pre-commissioning activity will commence in May 2008. First oil is expected in November 2008.

Significant Environmental Impacts Identified

1.

None.
